ABOUT ME

I am a Computer Engineer working in cloud technology and data management, implementing scalable solutions with Huawei Cloud and PostgreSQL, backed by services such as RDS, DataArts Studio and API Gateway.

I have taken part in open data projects for the public sector: building ETL pipelines, making information available and training technical teams to operate cloud platforms. I currently design and implement BPM solutions in AuraQuantic, modeling processes, forms and business rules, with Power BI visualization and technical coordination of the development team.

My focus is on making information reliable, traceable and available to those who have to make decisions.

Cloud & Data
Huawei Cloud, ETL, data architecture and data availability.

Automation & BI
BPM in AuraQuantic and reporting in Power BI.

Technical coordination
Bridge between business areas and development teams, using the SCRUM methodology.

Public sector
ODE and Chile Emprende projects with the Ministry of Economy.

PROFESSIONAL EXPERIENCE

SPS Group

Aug 2024 — Present · Santiago, Chile

Progression from data engineer to AuraQuantic developer and technical coordinator, on open data and process automation projects.

AuraQuantic Developer

Jan 2026 — Present

End-to-end design and development of the BPM solution in AuraQuantic, covering planning, field execution, recording, control and analysis.

- Modeling of processes, forms, workflows and business rules.
- Technical coordination of the development team.
- Ongoing platform configuration.
- Integration of desktop and mobile components to capture operational data.

Technologies: AuraQuantic, BPM.

AuraQuantic / Power BI Developer

Oct 2025 — Present

Development and implementation of BPM solutions in AuraQuantic throughout the project lifecycle.

- Gathering and validating requirements with users and business areas.
- Modeling of workflows and forms, and advanced configuration.
- Evolutionary and corrective improvements.
- Data integration and support for information visualization with Power BI.

Technologies: AuraQuantic, BPM, Power BI.

Backend Developer & Technical Coordinator — Chile Emprende Platform

Jun 2025 — Oct 2025

Design of the data model and backend logic for the smart recommendation of government support programs on a web platform for smaller businesses, with Clave Única authentication and centralized data management (ODE/SAD).

- Liaison between the Smaller Businesses Unit of the Ministry of Economy and the development team.
- Translating requirements into technical specifications and coordinating tasks.
- Ingestion flows via scraping and API integration.
- Power BI visualization.

Technologies: Backend, PostgreSQL, ETL, Web scraping, APIs, Clave Única, Power BI.

Data Engineer — external project-based support

Jan 2025 — Jun 2025

Data enablement for the «Chile Emprende» open data portal on Huawei Cloud.

- Optimization of PostgreSQL databases for visualization.
- Processing and loading of structured data with RDS, DataArts Migration and DataArts Factory.
- Automation of ingestion and validation flows.

Technologies: Huawei Cloud, PostgreSQL, RDS, DataArts Migration, DataArts Factory.

Data Engineer — Economic Data Observatory (ODE) project

Aug 2024 — Dec 2024

Cloud development on Huawei Cloud with DataArts Studio, DataLake Insight, API Gateway, RDS, MRS and OBS.

- Building data infrastructure and integrating services.
- Creating and managing Data Lakes.
- Deploying APIs to automate data loading.
- Use of data security and governance services.

Technologies: Huawei Cloud, DataArts Studio, DataLake Insight, API Gateway, RDS, MRS, OBS.

Ministry of Economy, Government of Chile

Jan 2025 — Jun 2025 · Santiago

External Mid-level Consultant

On-site advisory for the implementation of the ODE project.

- ETL pipelines and cloud architecture to integrate and automate data ingestion from public institutions (SII, Sercotec, Corfo, DAES, Cooperativas).
- In-person training for public officials on using the ODE platform and SQL fundamentals.
- Support for the production rollout and technical documentation of the data flow.

Technologies: DataArts Studio, DataLake Insight, API Gateway, RDS, MRS, OBS, ETL, SQL.

Previous experience

Web administrator and marketing strategist — ElPet

May 2024 — Jul 2024

WordPress content updates, SEO and Google Ads campaigns; SKU creation, inventory control and rollout of the Gesnex sales system, including team training.

Technologies: WordPress, SEO, Google Ads, Gesnex.

IT and sales assistant — UltraPC DHC

Mar 2024 — May 2024

Migration to a business database with SQL and technical support for the e-commerce store.

Technologies: SQL.

Sales data analyst — CSBYTE

Jul 2023 — Sep 2023

Collection of sales data and market analysis with Python and SQL, with metrics in Excel.

Technologies: Python, SQL, Excel.

E-commerce and Digital Marketing Administrator — CSBYTE

Sep 2021 — Jun 2023

Management of PrestaShop and WooCommerce stores, advertising audiovisual content and computer consulting.

Technologies: PrestaShop, WooCommerce.

SKILLS AND TECHNOLOGIES

Cloud Computing	Huawei Cloud · RDS · DataArts Studio · DataArts Factory · DataArts Migration · DataLake Insight · OBS · MRS · API Gateway
Data Engineering	ETL · Data Lakes · Data modeling · Data architecture · Ingestion and validation automation · Data security and governance
Databases	PostgreSQL · SQL
Software development	Python · APIs · Web scraping · HTML + CSS · JavaScript · TypeScript · Next.js · React · Kotlin + Jetpack Compose · WordPress
Automation	AuraQuantic · BPM · Modeling of processes, forms and business rules
Business Intelligence	Power BI · Excel
Process management	Requirements analysis · SCRUM · Technical coordination · User training
Other technical skills	PrestaShop · WooCommerce · SEO · Google Ads · Gesnex

EDUCATION

Computer Engineering

2021 — 2024

Instituto Profesional Duoc UC

Degree completed. Software architecture and quality, service integration, database modeling and programming, and IT project management.

Physical Education Teaching (not completed)

2018 — 2020

Universidad Metropolitana de Ciencias de la Educación

A foundation in communication, planning and teamwork that I now apply to user training and to coordination between technical and business areas.

PROJECTS

Economic Data Observatory (ODE)

Data infrastructure on Huawei Cloud to integrate information from public institutions (SII, Sercotec, Corfo, DAES, Cooperativas), with ETL pipelines, Data Lakes and automated loading APIs. It included training for Ministry of Economy officials.

Technologies: Huawei Cloud, DataArts Studio, PostgreSQL, API Gateway.

Chile Emprende Platform

Web platform for smaller businesses that integrates data from multiple public institutions and recommends government support programs, with Clave Única authentication. I worked on the data model, the backend logic and technical coordination.

Technologies: Backend, PostgreSQL, ETL, Power BI.

ProRoller IN DEVELOPMENT

Skating content platform: disciplines, tutorials, safety guides and places to skate, with multi-language support.

Technologies: Next.js, React, TypeScript.

pro-roller-six.vercel.app

ADDITIONAL INFORMATION

Languages	International English — upper-intermediate level (Duoc UC certification)
Public sector	ODE and Chile Emprende projects with the Ministry of Economy, Government of Chile.
